

Best Practice in the Use of Outcome-based Care: A 10-year Analysis of Behavioral Outcomes

Presented by:

Darrin Hanna, Ph.D.

Dr. Hanna is an expert in Systems Engineering in the area of artificial intelligence and embedded systems focused in clinical settings. He works regularly in efficiently implementing technology and electronic records in the clinic, streamlining evidence-based practice, using technology to improve service quality while reducing costs in the short and long term, and outcome-based care.

Highlights include:

- Analyzing 10 years of behavioral outcomes
 - Program and treatment methods that have shown to be more effective with consumers
 - Helping consumers reduce their symptoms and obtain goals more quickly
 - Results presented are based on actual behavioral outcomes from each individualized program and diagnosis
 - Medications that have improved consumers' ability to obtain their goals and objectives
- Includes over 5000 consumers within multiple sites of residential, outpatient and community programs

David Ballenberger, MSW

Mr. Ballenberger has thirty-seven years experience in various social work capacities from direct care and counseling to administration, with emphasis on behavioral treatment program development. Mr. Ballenberger has designed programs in independent living preparation; supervised independent living, day treatment, short-term residential care and aftercare and Rose Hill Center; a psychosocial rehabilitation program.
